

# PAULA FERREYRA

## INFORMATION SYSTEMS DEVELOPER

 MENDOZA, ARGENTINA

### SUMMARY

I am a fourth-year Information Systems Engineering student with experience in web development and programming. My education enables me to combine technical skills in programming languages with a strong focus on system management and data analysis. I am passionate about creating efficient, secure, and scalable solutions. I am constantly seeking opportunities to apply my knowledge to innovative projects and am committed to continuous personal and professional growth.

### ACADEMIC BACKGROUND

- Information Systems Engineering (Universidad Tecnológica Nacional, 2020–Present).
- University Information Systems Analyst (Universidad Tecnológica Nacional, 2020–2024).
- Full Stack Developer Course (2022).

### LANGUAGES

English C1  
Spanish Native

### WORK EXPERIENCE

#### Database Developer

(2022)

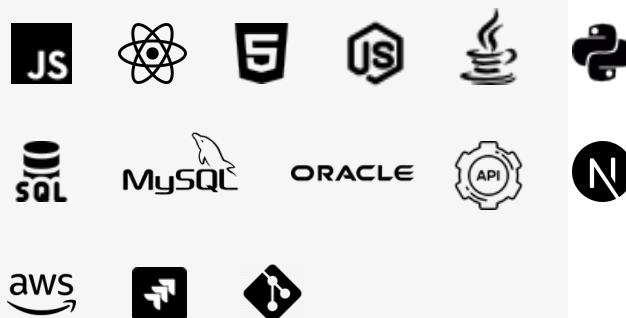

Designed and developed an SQL database for a gymnastics academy, improving data management efficiency and securing sensitive student information.

#### Full Stack Developer

(2023)

Developed a complete web application for a café using front-end and back-end technologies. Created an intuitive interface for users and administrators, integrating features like menu management and online reservations. Also handled database integration for storing product and transaction information.

### TECHNOLOGIES AND TOOLS

### BEST PRACTICES

- Effective communication
- Team Collaboration
- Proactive Mindset
- Write clean and maintainable code
- Version control
- Testing and debugging
- Agile methodologies
- Documentation
